

# Secure health information in one place

**If you were unable to visit your usual medical centre or you had an accident, could another health professional access your important medical history?**

Now available in Auckland, Your Health Summary gives authorised medical services easy access to your health information so you can continue to get the best care. **And it's available 24 hours a day.**

You can choose to 'opt off' if you don't wish to have your information shared, however this may result in delays in your treatment if any doctor needs to conduct tests you've already had, and/or spend more time to find out important medical history.

**Your information is only available to authorised clinicians (doctors, nurses, paramedics) if/when they are treating you. The information cannot be used, sold or transferred to anyone for any other purpose.**

To opt off please email your name, date of birth and contact details to [contact@yourhealthsummary.org.nz](mailto:contact@yourhealthsummary.org.nz)

## **The types of health information that can be shared include:**

- Medical conditions
- Medications
- Allergies
- Radiology results
- Immunisations
- Recalls
- Laboratory test results
- Discharge summaries
